## **Pixera introduces a Camera Switch for users that need to operate two camera systems from one computer!**

**Pixera Corporation, Los Gatos, CA - November 15, 2002**

Pixera has introduced Penguin/Pro-CS, a camera switch that allow users of Penguin and Pro Series camera systems to switch between two camera systems from one computer. The Penguin/Pro-CS camera switch was developed in response to users that need to operate a second color or monochrome camera system from an existing computer due to space and cost considerations. The Penguin/Pro-CS camera switch is electro-mechanical, designed for table-top use, it's small in size 5.9"/150mm(W) x 3.9"/100mm(D) x 2.16"/55mm(H), includes 10ft cable and works with both Windows® and Mac® operating systems.
